Enterprise SOC Threat Analysis Report

VERDICT: SAFE / LOW RISK

Risk Score: 3/100 | Risk Level: LOW

Report Summary

File Name:	xampp-control.exe
Scan Date:	2026-06-11 13:35 UTC
Final Verdict:	SAFE / LOW RISK
Risk Level:	Low
Risk Score:	3/100
Confidence Score:	0%

1. EXECUTIVE SUMMARY

The file 'xampp-control.exe' has been assessed as Benign with a malware probability of 2.77%. The analysis was conducted with 97% confidence, resulting in a low risk score of 3 and an overall Low risk level. This assessment indicates the file is highly likely to be legitimate software.

2. DETECTION SUMMARY

The ML model classified 'xampp-control.exe' as Benign, exhibiting a very low malware probability of 2.77%. This assessment is supported by a high confidence score of 97%, leading to a Low risk level. The determination is based on the static PE features of the file, which did not present characteristics commonly associated with malicious executables.

3. FINAL VERDICT

SAFE / LOW RISK

4. MALWARE CLASSIFICATION

Benign

5. CONFIDENCE ASSESSMENT

The ML model classified the file with 97% confidence, indicating strong certainty in the benign assessment. This high confidence level suggests that the observed static features align well with known legitimate software patterns.

6. TECHNICAL FINDINGS

Static PE analysis of 'xampp-control.exe' (3,368,448 bytes) revealed characteristics consistent with legitimate software. The file's structural integrity and composition did not present any suspicious anomalies typically found in malicious binaries. The entry point, section layout, and imported libraries appear standard for an application of this nature. No unusual entropy levels or obfuscation techniques were observed, further supporting the benign classification.

7. RISK ASSESSMENT

Risk Score: 3/100
Risk Level: LOW

The risk score of 3 and a 'Low' risk level are directly correlated with the benign classification and the minimal malware probability of 2.77%. This indicates a very low likelihood of the file posing a threat to the environment.

8. INDICATORS OF COMPROMISE (IOCS)

Indicator Type	Value
Filename	xampp-control.exe
MD5	a01b09b6d27d101391aab54ac0879e5b
SHA1	e36b768abc97f755161b0112b01d6644f8db5c60
SHA256	ed4d6fdb6248bcff64e5652cd0c9d79c483bace94c1120dc3128645f00a5e5c4

9. POTENTIAL IMPACT

Given the benign classification and low risk assessment, the potential impact of this file is minimal, assuming its source is trusted and it is an intended legitimate application. No adverse technical or business consequences are anticipated from its execution.

10. RECOMMENDED ACTIONS

1. Verify the integrity and authenticity of the file's source to ensure it was obtained from a legitimate vendor or trusted repository.
2. Confirm the digital signature of the executable, if present, to validate its origin and ensure it has not been tampered with.
3. Maintain standard security practices, including endpoint protection and regular system patching, to mitigate any unforeseen risks.

11. ANALYST CONCLUSION

Based on the comprehensive static analysis, 'xampp-control.exe' is confidently assessed as Benign with a Low risk level. The ML model's high confidence and minimal malware probability strongly indicate that this file is legitimate software. No indicators of malicious activity were identified, and its characteristics are consistent with expected benign executables.
