

# AI Malware Investigation Report

Enterprise SOC Threat Analysis Report

**VERDICT: SAFE / LOW RISK**

Risk Score: 3/100 | Risk Level: LOW

## Report Summary

|                   |                      |
|-------------------|----------------------|
| File Name:        | fdm_x64_setup.exe    |
| Scan Date:        | 2026-06-11 11:36 UTC |
| Final Verdict:    | SAFE / LOW RISK      |
| Risk Level:       | Low                  |
| Risk Score:       | 3/100                |
| Confidence Score: | 0%                   |

## 1. Executive Summary

The file 'fdm\_x64\_setup.exe' has been assessed as Benign with a low malware probability of 3.49% and a high confidence score of 97%. The overall risk score is 3, classifying it as a Low risk to the environment.

## 2. Detection Summary

The ML model classified 'fdm\_x64\_setup.exe' as Benign, indicating a low malware probability of 3.49% with a strong confidence score of 97%. This assessment results in a Low risk level, primarily due to the absence of suspicious static PE features and the presence of characteristics consistent with legitimate software installers.

## 3. Final Verdict

SAFE / LOW RISK

## 4. Malware Classification

Benign

## 5. Confidence Assessment

The ML model classified the file with 97% confidence, indicating strong certainty in the benign assessment. This high confidence score suggests that the analysis of static PE features aligns well with known benign software patterns.

## 6. Technical Findings

Static PE analysis of 'fdm\_x64\_setup.exe', with a size of 48,165,568 bytes (approximately 47.04 MB), revealed no suspicious structural anomalies. The file's hashes (MD5: 90d9bb809ce06f09bc8c6cd243bfcabb, SHA1: fa907ce037871b2a6db1edc1519e2d0d57e5c2db, SHA256: 167012f1720f5450588ac4c29db3799427498663fcba21a6ed64bf15ed4d2c5f) are consistent with a known software installer. The file exhibited characteristics consistent with legitimate software, lacking indicators typically associated with malicious executables.

## 7. Indicators of Compromise (IOCs)

| Type     | Value                                                            |
|----------|------------------------------------------------------------------|
| Filename | fdm_x64_setup.exe                                                |
| MD5      | 90d9bb809ce06f09bc8c6cd243bfcabb                                 |
| SHA1     | fa907ce037871b2a6db1edc1519e2d0d57e5c2db                         |
| SHA256   | 167012f1720f5450588ac4c29db3799427498663fcba21a6ed64bf15ed4d2c5f |

## 8. Risk Assessment

**Risk Score:** 3/100

**Risk Level:** Low

The file's low risk score of 3 and 'Low' risk level are directly attributed to the ML model's benign verdict and high confidence. This indicates a minimal likelihood of malicious activity based on the analyzed static features.

## 9. Potential Impact

If the source of 'fdm\_x64\_setup.exe' is verified as legitimate and trusted, the potential impact is minimal. The file is expected to perform its intended function as a software installer without introducing security risks to the system.

## 10. Recommended Actions

1. Verify the integrity and authenticity of the software source to ensure it was downloaded from a legitimate vendor.
2. If available, verify the digital signature of the executable to confirm its publisher and ensure it has not been tampered with.
3. Continue to adhere to organizational security best practices, including regular system patching and endpoint protection.

## 11. Analyst Conclusion

Based on the static analysis, the file 'fdm\_x64\_setup.exe' is assessed as Benign with a high confidence of 97% and a low risk score of 3. The ML model's assessment indicates that this file is consistent with legitimate software installers and poses no immediate threat. Further investigation is not warranted unless additional dynamic behavioral anomalies are observed.
