

# AI Malware Investigation Report

Enterprise SOC Threat Analysis Report

**VERDICT: SAFE / LOW RISK**

Risk Score: 3/100 | Risk Level: LOW

## Report Summary

|                   |                      |
|-------------------|----------------------|
| File Name:        | fdm_x64_setup.exe    |
| Scan Date:        | 2026-06-11 13:56 UTC |
| Final Verdict:    | SAFE / LOW RISK      |
| Risk Level:       | Low                  |
| Risk Score:       | 3/100                |
| Confidence Score: | 0%                   |

1. EXECUTIVE SUMMARY

An analysis of the file 'fdm\_x64\_setup.exe' has resulted in a Benign verdict with a malware probability of 3.49%. The ML model classified this file with 97% confidence, indicating a strong certainty in its assessment. The overall risk score is 3, placing it in the Low risk category.

2. DETECTION SUMMARY

The ML model assessed 'fdm\_x64\_setup.exe' as Benign, with a low malware probability of 3.49% and a high confidence score of 97%. This assessment places the file in the Low risk category with a score of 3. The benign classification is attributed to the file's static PE features, which align with characteristics typically observed in legitimate software, lacking any indicators commonly associated with malicious executables.

3. FINAL VERDICT

SAFE / LOW RISK

4. MALWARE CLASSIFICATION

Benign

5. CONFIDENCE ASSESSMENT

The ML model classified the file with 97% confidence, indicating strong certainty in the benign assessment. This high confidence score suggests that the model found a clear alignment of the file's characteristics with known benign patterns, minimizing the likelihood of misclassification.

6. TECHNICAL FINDINGS

The file, identified as 'fdm\_x64\_setup.exe', has a size of approximately 47 MB (48,165,568 bytes). Its cryptographic hashes are MD5: 90d9bb809ce06f09bc8c6cd243bfcabb, SHA1: fa907ce037871b2a6db1edc1519e2d0d57e5c2db, and SHA256: 167012f1720f5450588ac4c29db3799427498663fcb21a6ed64bf15ed4d2c5f. Static PE analysis revealed no suspicious structural anomalies. The file exhibited characteristics consistent with legitimate software.

7. RISK ASSESSMENT

Risk Score: 3/100  
Risk Level: LOW

The file received a risk score of 3, categorizing it as Low risk. This is based on the ML model's benign verdict, the very low malware probability of 3.49%, and the high confidence in this assessment. The static analysis did not identify any malicious indicators.

8. INDICATORS OF COMPROMISE (IOCS)

| Indicator Type | Value                                                            |
|----------------|------------------------------------------------------------------|
| Filename       | fdm_x64_setup.exe                                                |
| MD5            | 90d9bb809ce06f09bc8c6cd243bfcabb                                 |
| SHA1           | fa907ce037871b2a6db1edc1519e2d0d57e5c2db                         |
| SHA256         | 167012f1720f5450588ac4c29db3799427498663fcba21a6ed64bf15ed4d2c5f |

9. POTENTIAL IMPACT

Given the benign classification and low risk assessment, the potential impact of this file is minimal, assuming it originates from a trusted source and its integrity has not been compromised. It is expected to function as intended without introducing security risks to the system.

10. RECOMMENDED ACTIONS

1. Verify the integrity of the file by checking its digital signature if available, and ensure it was downloaded from a legitimate and trusted source.
2. Maintain robust endpoint security solutions and ensure they are up-to-date to provide ongoing protection.
3. Adhere to organizational security policies regarding software installation and execution.

11. ANALYST CONCLUSION

The file 'fdm\_x64\_setup.exe' has been assessed as Benign with a high confidence level of 97% and a Low risk score of 3. Static analysis of its PE features and metadata did not reveal any indicators of compromise or suspicious behavior. Based on the current intelligence, this file is considered safe for deployment, provided its source is verified as legitimate.
